[linkedin.com/in/aman-pareek](https://linkedin.com/in/aman-pareek)    [github.com/Amanp30](https://github.com/Amanp30)

Proficient full-stack developer excelling in React, Next.js, Node.js, and MongoDB. Specializing in building responsive frontends with lightning-fast REST APIs. Improved development practices by 70% and spearheaded the creation of a website that attracted over 200k users.

## SKILLS

---

Tailwind CSS, React.js, Express, Node.js, MongoDB, Next.js, JavaScript, HTML, CSS, Visual Studio Code, Git, GitHub, Webpack

## PROJECTS

---

**Tradebook**    [mytradebook.vercel.app](https://mytradebook.vercel.app)

- Created a full-stack web app using the MERN stack.
- Integrated Redux and Chart.js for enhanced functionality .
- Implemented user registration, share market trade logging, and data analysis functionalities, inspired by the comprehensive features, including the calendar report, offered by Zerodha.

**BP Logger**    [bp-logger.vercel.app](https://bp-logger.vercel.app)

- Developed a fully responsive website using HTML, CSS, and JavaScript.
- Implemented localStorage for data storage and enabled user management for saving multiple users' latest blood pressure readings.

**Hey Birthday**    [hey-birthday.vercel.app](https://hey-birthday.vercel.app)

- Developed a robust MERN stack web application, employing MongoDB's native Node.js driver for transactions.
- Implemented user management, birthday tracking, list creation, sharing features, and incorporated dark mode functionality.

**Investor.js**    [investorjs.vercel.app/docs](https://investorjs.vercel.app/docs)

- Published a comprehensive NPM package containing essential financial functions.
